

How can two or more political parties campaigning against one another, utilizing millions upon millions of tax payers' money, find themselves then having to join opposition parties to win? Why waste all that money to fight their opposition if they really in it together? So does that mean the money gets returned to the Tax payers? Because there clearly was no reason to utilise tax payers' money to campaign against their opposition to try to win only to then have to join forces with them to do so. The illegitimate technicalities are self explanatory let alone the most often rigged voting system itself.

What is the purpose of voting???? If Australia is a Corporate, and the whole Taxation and Voting system is a Hoax?

The recycling turns out to also be a total hoax.....All these many years of paying soooooooooooooooooooooo much money on recycling bin rates, scare tactics they used and placing the onus on the people to ensure they know how to use those recycling bins.....all the billions and billions of dollars invested in recycling.....where on earth did that money really go if there was no such thing as recycling? Which was dumped in other countries such as Malaysia, China, Vietnam, Indonesia, India and the list goes on. For how long has this being going on?

“dumping in poorer countries is coming to an end. Calling it recycling is a joke. Nothing get recycled it gets buried”

venom

<https://www.rt.com/business/455060-australia-recycling-crisis-india/>

What is the purpose of recycling bins???? Why are Australians paying recycling bin rates and other expenses regarding recycling???? Who exactly initiated the program of recycling? And where did that money go to? Shouldn't that money be all returned to the tax payers?

The whole Employment Agencies that they somehow indoctrinate so-call Providers is also a hoax based on tax payers money. They are thus not entrepreneurs all those of employment companies. Who do you think actually creates the unemployment in the first place?

The very ones who create the problems find themselves creating the solutions all for money. YOUR money.

When recessions were created, or high interest rates or financial collapses, the money has to go somewhere. So whilst the very people paying taxes lose their financial gains, their assets, their businesses, their homes they worked hard for.....where does it all go to? It goes right into the very pockets of the ones who create the problem in the first place. Then the very same culprits create so called employment agencies to have YOU running around finding a job, whilst with YOUR money they pay others to dictate to YOU that you have to go running around whilst they have to tick some protocol boxes so that they can get paid. Wow!

AND the tax payers are forced to accept jobs that are against their principles, ethics, morals, and so forth.

A dear friend currently has joined so many of those employment agencies all at once and what this soul discovered is mindblowing.!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

Here is something worth knowing and so important to know. I personally verify its authenticity fully.

An insurance company has a client who signs for income protection. Something happens due to major medical reasons. They try to claim the income protection. But the insurance company lures them to accept disability claim. But they did not sign for disability or life insurance. They signed for income protection. They are then forced to accept without having signed disability and life insurance. Years of abuse, intimidations, threats, invasion of privacy, immense concerns arise. Eventually losing everything the client then seeks financial assistance through 'Centrelink'. The client is asked to provide an extensive medical report.....then another then another then another.....sounds like an insurance company..... overridden by unqualified persons!!!! The client's health debilitates.....guess what? That insurance company has contacted Human Services/Centrelink to ensure that the client does not get the disability pension, so that the insurance company does not then pay out the disability claim, to which mind you the client did not even sign or had in the first place. The client had signed and asked for Income Protection.

The world has started to become Transparent though and I was told that some have organised to activate something to ensure that a lot of further information becomes available to the public regardless.

The unethical misconduct and nature of this very seriousness of what has been happening, let alone the appalling unprofessionalism occurring in so many sectors of the matrix system is 'mindblowing'. Even regarding Centrelink, Assessment Assessors and Job Capacity Assessors, Employment Agencies or Services labeled as so called providers, Community and Charity Centers. There have been stolen funds that were to be allocated to clients, abuse and sexual abuse, exploitation of clients sent to certain jobs that were not appropriate for them, targets of exploitation for this includes businesses run down also. There was a lot of manipulation, threats, invasion of privacy and intimidation occurring, as well harassment.

The enormity of trauma they put clients through. There are crimes committed, corruption and what some are doing to people has been very disturbing.

The truth is not avoidable when there are so many cases, complaints and deaths and abuse that have occurred amongst these organizations that have now reached pinnacle counts. Especially money taken from the allocated funds to serve themselves rather than the interest of the public in need. Many have been exposed, some organizations in certain locations have closed, and there is a lot of more disclosures to unfold inevitably. Nothing will stop that despite what some are saying.

Here are some very important points though to ask in anything, especially where there is a handling of anything that is foremost confidential and secondly sensitive:

- What exactly is the purpose, goal, motive, aim, intention of their job/role for a particular case?
- Exactly what specific code protocols must they carry out to reach the outcome of the purpose of their role?
- Do they fully read the whole case so as to fully grasp the true complaint and understanding of the whole case and know why it has had to reach to a certain level, because clearly it seems not?

- How many years have they had a job in such very important positions? And how many years have they been in that specific job?
- What are their qualifications/credentials in regards to having a job regarding a case?
- How many 'such' cases have they dealt with in order for the customer/client/patient to understand if they have any experience in such cases?
- What is their Moral Obligation to a case?

These are very important questions that anyone should have the right to know the answers to when wanting a case to be handled rather being undermined, bullied, threatened and abused as acceptable.

This particular matrix system has shown to be 'rigged' because they do not filter individuals that should be appropriate for positions. That goes for every sector of the matrix system. Including medical. BUT, the good news is thanks to whistleblowers, anonymous warriors, known and unknown, and the very ones who are affected or suffered, for the avalanche of disclosures unfolding to enforce the whole matrix to collapse. There are computer wizards that are now creating programs that are outside the whole of the matrix so that a lot more disclosures come out. Astounding!!!!
